## NO STRONGER BIAS TYRE IN ITS SIZE

Its massive deep tread increases service life while providing the strongest carcass and optimal sidewall protection. This extremely durable bias tyre is the ideal on hard surfaces and in highly abrasive environments.

### WIDE THICK SIDEWALL WITH RIM GUARD

- Provides best lateral impact resistance

### MASSIVELY DEEP TREAD

- Provides longer service life

### SEVERE-DUTY CARCASS

- Maximizes tread puncture resistance to prevent flat tyres

#### Remarks

(1) Consult tyre and wheel manufacturer for confirmation of the suitability of the tyre/rim combination particularly with regard to rim profile and wheel strength.

(2) The speeds quoted in the table are the maximum speeds of the unloaded vehicle. An increase in load capacity for lower speeds is not permitted. Loads apply to cyclic service applications. Cyclic service means applications where tyres are not used continuously at the load indicated by its Load Index and Speed Symbol. It does not refer to the length of time a vehicle is in use, but rather that there is a variation in load and/or speed.

\* Tube size is identical to tyre size.

\*\* Table shows standard valves. Other valves on request.

**NHS – Not for Highway Service: Tyres primarily designed for use outside of public roads, but suitable for temporary/incidental use on public roads.**

All tyres come with tube and flap.
