

CAMSO AIR 775

PORT
APPLICATIONS

READY FOR HEAVY-DUTY PORT CHALLENGES

Built with a very strong carcass and deep tread profile, this tire provides a long-lasting solution and excellent stability for heavy load applications.

HIGH-PERFORMANCE COMPOUND WITH THICK USABLE TREAD

- Provides superior tire life

SMOOTH TREAD DESIGN

- Avoids lug tearing and increases steerability

WIDE AND FLAT TREAD PROFILE

- Delivers optimal stability

SEVERE-DUTY ROBUST CARCASS

- Sustains heavy loads, typical of port applications

Remarks

(1) Consult tire and wheel manufacturer for confirmation of the suitability of the tire/rim combination particularly with regard to rim profile and wheel strength.

(2) The speeds quoted in the table are the maximum speeds of the unloaded vehicle. An increase in load capacity for lower speeds is not permitted. Loads apply to cyclic service applications. Cyclic service means applications where tires are not used continuously at the load indicated by its Load Index and Speed Symbol. It does not refer to the length of time a vehicle is in use, but rather that there is a variation in load and/or speed.

* Tube size is identical to tire size.

** Table shows standard valves. Other valves on request.

NHS – Not for Highway Service: Tires primarily designed for use outside of public roads, but suitable for temporary/incidental use on public roads.

All tires come with tube and flap.
