## REDDOT provide professional solution

By focusing on enhancing reliability, reducing downtime, the XF series is able to make the greater productivity for customer.

Careful design facilitates inspection and servicing. Easy maintenance reduces the amount of downtime and helps to reduce cost also.

The new patent dynamic load sensing hydraulic steering system contributes to reduce loss of hydraulic, improve energy consumption and increase 15% lifting speed.

### Details show

The new stamped air cleaner featuring tangential intake, double seal with safety filter is durable, corrosion-free and vibration-resistant, provides better filter efficiency and lower intake resistance than the previous.

There're four levels shock absorber applied to reduce the vibration from the road to the driver. The damping pad is applied reduce the vibration. Like between the steering axle and the chassis, the engine, torque converter and the chassis, the overhead guard and the chassis. And the suspension seat is another vibration redutiae.

The patent plated-fin type aluminum radiator is applied, the heat exchanging is approved, and improves the capability for operation in severe environments.

High strength chassis, mast and front/rear axle are to make sure the reliability of the truck, even for high strength application.

The new design mast provides broad forward visibility due to the distance between inside mast is increase 60mm.

All the controllers, relays, and safety fuses are allocated in the controller box, free to water and dust. The main electronic components are waterproof, which is capable operator in severe environment. And the famous brand air-filter is also applied in the truck.
