## REDDOT provide professional solution

The latest appearance design method was used to create the R series fluent and aesthetic outline, that matches the latest appearance trend.

The environment friendly engines all meet related emission control regulation. The noise emission also comes up to EU standard.

The 1-5.0t(mini) forklifts all adopt the new type drum brake. Waterproof slot on the brake drum and framework oil seal on the axle tube avoid water or oil entering the brake drum, enable the dependability of brake to raise consumedly.

### Details show

The clearance between the steering axle and support rod can be adjusted, to improve the adaptability for ground.

Adopted recently developed redirector decreases the steering wheel force to 6~8N only, that reduce 50% compared with former truck.(1-5T Mini)

The extra foot space is provided to reduce operator fatigue significantly. The non-slip step makes getting in and out easy and safe.

The high performance specific tires for forklift trucks increase the work life of tires much more.

Compact design offers same dimensions as conventional integrated models. May be coupled to the differential axles. Making installation, removal, and maintenance easy.(1-5T Mini)

In addition to the soft landing system, the soft lifting system is adopted (front lifting cylinders of triplex mast) and full free duplex mast, as a result, the noise and shock of the mast significantly decreases.
